

# Why use CCTV...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

- ✦ To Deter & Detect Criminal Activity
- ✦ To Identify Suspects
- ✦ To Gather Evidence
- ✦ To Gather Intelligence
- ✦ To Aid Prosecutions
- ✦ To Monitor Anti-Social Behaviour
- ✦ To Assist Emergency Services
- ✦ Traffic Management
- ✦ To Improve Community Safety
- ✦ To Help Reduce The Fear Of Crime
- ✦ To Reduce The Threat of Criminal Activities
- ✦ To Assist Local Authority Enforcement
- ✦ To Assist With Injury Or Insurance Claims

# System Design...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

Effective design of a CCTV system is crucial to the outcome of your end system. EuroComs have in-house CCTV design teams that use the latest CCTV design software to demonstrate and calculate area coverage, angles, lens type, lighting and detector location.

EuroComs can design 1 – 1,000 camera systems, utilising the latest technology from Sony, Samsung, Mobotix, Pelco, Panasonic, Sanyo and Dedicated Micros, the leading CCTV manufacturers, to get the best solution for you.

# Installation...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

EuroComs CCTV engineers have worked throughout Europe on some of the largest hotels, hospitals, supermarkets and airports. Our engineers are trained to the highest standards and are fully experienced and qualified to implement your CCTV system.

EuroComs are working towards ISO:9001 quality standards our clients and future clients can always be assured of a quality service incorporating technology with excellent service.

We also have security cleared engineers for the more data sensitive systems.

# Maintenance...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

The maintenance of any security system is crucial. CCTV maintenance can be preventive and corrective. Preventive maintenance is done with the purpose of avoiding system problems from taking place and keep it functioning well and error free.

EuroComs maintenance includes a 4-hour UK wide response for all 50% or more system failures and 8-hour response for all other issues.

We carry out routine maintenance checks on a quarterly basis to ensure all our systems are running as smoothly and as efficiently as possible.

## Commissioning...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

EuroComs CCTV engineers and management team individually sign-off any installation work and supply and full test sheet to all customers. We prefer our client to be on-site during project hand-over to ensure full client satisfaction.

In addition to test documentation, EuroComs will also supply warranties and installation 'as fitted' drawings in CAD format.

All our installations include fully manufacturer backed warranty and one years maintenance.

**Financial Times**

## Training...

Over 30 per cent of CCTV end users have not been trained by their installer on how to get the best out of their CCTV system. And over 50 per cent of end-users have not received training from equipment manufacturers.

EuroComs will not sign-off the installation until we are content the end-users have the ability to get the most from their system. We ensure that both technical and non-technical users have received the support they require.

We also offer 24/7 contact details for response and operation instructions.

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

# Monitoring...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

EuroComs works closely with our partners to ensure the best external monitoring solution for our customers.

We use technology to **prevent** crime happening. When intruders enter a protected site, live images are transmitted to a national control room, operators issue warnings and scramble local Police response teams.

Eurocoms and our partners take responsibility for everything, from site survey, system design and installation, to maintenance, 24/7/365 monitoring and liaison with the Police.

# Our Systems...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

EuroComs offer a range of cameras, screens, recording devices, infrastructures and manufacturers to allow our design teams to offer bespoke solutions.

- ✿ Internal & External Solutions
- ✿ Dome, Traditional, Night/Day & Infrared Cameras
- ✿ Fixed, Varifocal & PTZ Lens
- ✿ Covert & IP Cameras
- ✿ Vandal Proof Cameras
- ✿ ANPR Cameras & Systems
- ✿ PIR's for Movement & Heat
- ✿ DVR's & Network Storage Systems
- ✿ Wireless & Wired Solutions
- ✿ External Monitoring

# Warranty...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

EuroComs offer the warranty on our CCTV systems;

- ⚙️ 25 Years Warranty on Cabling Infrastructure
- ⚙️ 25 Years Warranty on Hardware Installation
- ⚙️ 1 Year Manufacturer Backed Hardware Warranty
- ⚙️ Extended Warranties Available

We can offer this warranty because of the quality of materials and experience and training of our engineers. All our installation work is tested thoroughly before we leave the site.

## Case Study...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

### Bradfield Academy, Sheffield, UK.

EuroComs was awarded the CCTV design and installation as part of a £25 million contract by Sheffield City Council to build the School as part of the Building Schools for the Future (BSF) programme.

EuroComs determined the best solution would be IP based, given that the School was having a complete new ICT solution which comprised a Category 6 network.

Our chosen manufacturer for the installation was Mobotix by Excel Networks. Mobotix offer a high-definition range of Ipcameras. The primary benefit...

of using HD cameras is that stored images are more revealing and provide storage evidence in other formats.

In total, EuroComs installed 36 vari-focal lens Mobotix cameras throughout the School, with internal area coverage at 93% and perimeter coverage of 100%.

Thanks to their unlimited scalability and high performance, MOBOTIX cameras are suitable both for large facilities like schools and, given their integrated event, storage, alarm and telephony functions, for smaller business and private premises.

## Case Study...

All EuroComs engineers are trained to the highest standards and have an enviable reputation for quality CCTV installation and maintenance.

### **Walkers Chocolates, Birmingham, UK.**

EuroComs were contracted to design and install a CCTV system for Walkers Chocolates' international warehouse distribution centre.

EuroComs opted to use Sony PTZ high-speed dome cameras and a Dedicated Micros (DM) DVR. The cameras were chosen based on the HD lens and high speed PTZ control. The DM DVR chosen offers ease of setup and the ability for Walkers to view images externally over the internet and allows EuroComs partner, CAMWATCH, to monitor Walkers site out-of-hours.

The customer also required the ability to control the

PTZ cameras externally. The built in software that DM has offers a user-friendly PTZ control screen, simply click the direction and zoom with a standard mouse.

EuroComs also setup roaming CCTV of the external warehouse with PIR sensors to monitor heat and movement. This offers a very cash-sensitive solution to giving 100% area coverage with only two cameras over an area of approximately 80m<sup>2</sup>.

EuroComs continue to maintain the system and have since been contracted to extend the CCTV network to another Walkers plant in Manchester.
